PRINTED BY H. H. KING, SUPERINTENDENT, ASSAM SECRETARIAT PRESS.

PREFACE.

This volume is to be regarded as a Supplement to the Sibsagar District Gazetteer. It consists of two parts. In the former such general information is contained as will bring the letter press of the original Gazetteer up to date. The remainder of the book is taken up by revised statistical tables. The Deputy Commissioner has kindly supplied the information.

SHILLONG :

October 1914.

SUPPLEMENTARY NOTE.

CHAPTERS I, II, AND III.

PHYSICAL ASPECTS, HISTORY AND THE PEOPLE.

There is nothing important to add to the information contained under these heads in the corresponding chapters of the original Gazetteer.

CHAPTER IV.

AGRICULTURE AND FORESTS.

Since the publication of the Gazetteer in 1905 considerable progress has been made in the direction of opening up the district. In many places the proximity of the railway has led to the reclamation from jungle of land which would otherwise have been left untouched. Improvements in communications and immigration of Nepalese and other settlers have also assisted.

One of the most important moves towards the spread of cultivation in the district is the attempt to colonise the Nambor forest. A special officer has been on deputation for some time to advance this project. An area of about 100 square miles has been thrown open to cultivation for the purpose of this scheme, which, if successful, ought to add materially to the revenue of the district.

There are no accurate statistics dealing with these classes of people. The Nepalese mentioned in the Census Report are mostly herdsmen who keep buffaloes and sell milk. Some of them have come with their wives and children and move from place to place with their

herds of buffaloes. The number of these people is growing so rapidly that the matter has attracted the notice of Government and inquiries have been made as to the advisability of limiting pasturage to certain definite areas. The area of land taken up by them was 1,590 acres in 1912-13. Besides the Nepalese, there are settled in the district many time-expired garden coolies, Marwaris, Railway coolies, and Mymensingh cultivators with whom an area of 54,033 acres has been settled.

Introduction of new crops. The only new crop of any importance is jute. It is not cultivated on a large scale in this district, but there is a prospect of its improvement in the near future. The low prices offered by the Marwaris to the cultivators are not calculated to encourage its development in Assam; the longer carriage from this province to the Indian markets is also a drawback.

Spread of the tea industry. During the last decade there has been some progress in the cultivation of tea. An area of 4,108 acres covered by 16 leases has been settled under the rules of 1876. The industry is attracting the attention of the people of the country and several well-to-do Assamese now own tea estates or are forming syndicates for the purpose of opening new or extending old gardens. Three new gardens have been opened, while many gardens have extended new areas, and in some cases abandoned old and unprofitable blocks of tea.

Game reserves. There is a large game reserve named the Kaziranga reserve in the vicinity of Bokakhat in Namdoyang mauza. Last year a certain area was added to it and this year again it has been proposed that a further addition should be made.

Formation of new reserved forests. Since the publication of the original Gazetteer additional areas of 86 and 17 square miles have been declared reserved forests under the names of the Kaziranga and Kakodanga forests, respectively.

CHAPTER V.

INDUSTRIES.

The minerals of the district are now being exploited ^{Coal and lime.} and several persons have been granted prospecting and mining leases for coal in the Naga and Mikir Hills, or have obtained the right to quarry limestone. Although strictly speaking within the Naga Hills district, mention should not be omitted of the Nazira Coal Company's property. The mineral is being worked from the foot of the hills, and the extension of the Assam-Bengal Railway to meet the output of coal should soon result in the opening out of the whole area on the right bank of the Dikhu between Santok and the outlying hills.

In the Dikhu river near Santok a stone quarry has ^{Stone quarry.} been found. Metal is taken by the Assam-Bengal Railway for ballast purposes and a siding has been laid up to the quarry. This line meets the main Railway line at a point near the Dikhu bridge.

The trade and commerce of the district are almost ^{Trade and commerce.} entirely in the hands of Marwari merchants and other foreigners. No new industries of any importance have been started in the district during the last decade.

CHAPTER VI.

ECONOMIC CONDITION OF THE PEOPLE.

The wages of unskilled labour have risen and in ^{Wages and prices.} many cases eight annas per diem is paid, six annas being the minimum wage. The wages of skilled labour vary from twelve annas to Re. 1-4 per diem. Even at these rates labour is scarce and household servants are most difficult to find. At the same time the prices of food stuffs, such as rice, *matikalai*, *mug*, etc., have gone up. Ordinary coarse kinds of rice and *matikalai* sell at 8 seers per rupee, *mug* at 3½ seers, ghee at Re. 1-8 per

seer, and milk at 6 and 7 seers per rupee. There has been an abnormal rise in the price of *eri* and *muga* silk. The present bazar rate of *muga* thread is Rs. 24 in place of Rs. 12 and Rs. 14 in the past. The increase is said to be due to the scanty supply and the large demand by the people of Eastern Bengal for embroidery work on cotton cloth.

Railways
and feeder
roads.

The requirements of the public have led to railway sidings being established and roads to connect these with the main arteries. The principal feeder roads to the larger stations have been improved and in some instances, as for example at Furkating, Nakachari, Seleng, and Nazira, the roads have been metalled.

Tram lines.

The cheapest form of carriage is being carefully considered by the various tea estates and several companies have laid down tram lines to the nearest railway stations. The longest of these are owned by the Assam, the Singlo, and the Scottish Assam Tea Companies.

Improvements in
road communications.

During the last two or three years liberal special grants have been made by Government for the improvement of roads in the district. The income of the three Local Boards was so small that it was not possible for works of any magnitude to be undertaken. The special grants have gone far to remove this difficulty, and much useful work has been done. There can be no doubt also that the advent of the motor car has done much to improve communications. The Local Board fiduciary agents who are also car owners have taken greater trouble with the sections under their control, and each year shows a steady improvement in the condition of the main roads. The heavier vehicle requires stronger bridges and the old bamboo structure is now rarely seen. Nearly all the main rivers are spanned by substantial screw pile bridges and the lesser waterways are covered by means of brick culverts.

Among the more important improvement projects may be mentioned the following ; —

About two miles of the road from the Sibsagar Road railway station to Sibsagar town is being metalled. The metalling of the road from the Bhojo station to Sonari in the Sibsagar subdivision is being carried out. In the Jorhat subdivision the metalling of the Seleng feeder road, Teok-Namsissu road and the Gurh Ali is in execution, while in the Golaghat subdivision the road from Farkating railway station to Golaghat, which is about five miles in length, is being metalled.

The Jorhat Union was raised to the status of a Municipality in February 1909. The income and expenditure have more than doubled since 1901. The increase is chiefly due to the inclusion of a larger area within the Municipality, to the imposition of taxes at a higher rate, and to the temporary influx of people from other districts in connection with construction works.

A portion of Nazira and its suburbs has been constituted a Union under Chapter III, Act V of 1876, with effect from July 1909. The affairs of the Union are managed by a Committee of six members, the Subdivisional Officer of Sibsagar being *ex-officio* Chairman, while the remaining five members are nominated by Government. The total area of the Union is 418 acres and it contains $5\frac{1}{4}$ miles of road, of which $1\frac{1}{4}$ miles are metalled. Drinking water is obtained from the Dikhu river and the Barbarua tank. Since the opening of the Assam-Bengal Railway, which passes through it, the place has become the centre of some trade.

CHAPTER VII.

GENERAL ADMINISTRATION.

In 1912 the headquarters of the district were transferred from Sibsagar to Jorhat. Sibsagar was thus reduced to the status of a subdivisional headquarters station.

Municipalities. Jorhat.

Unions. Nazira.

Transfer of the district headquarters.

Excise. The consumption of opium in the district decreased from 427 maunds to 404 maunds during the year 1909-10. Since then it has again shown a slight tendency towards increase. It is probable that the decrease in the consumption during the year 1909-10 was due to the enhancement of the Treasury price of the drug. The consumption of *ganja* is unfortunately gradually rising. This increase is no doubt largely due to the influx of the foreign population, but the habit is also extending among the Assamese. Similarly the consumption of country spirit shows an increase which is attributed to the increase in the number of tea-garden coolies.

Police. The military police guard which was formerly stationed at Abhaipur during the cold weather has been abolished. A new police outpost has been opened at Amguri in the Sibsagar Subdivision and two more are under construction at Titabar and Teok in Jorhat, while the outpost at Seleng has been abolished. The thana at Dimapur has been transferred to the Naga Hills with a tract of the country adjoining it (*vide* Government Notification No. 6253R., dated the 15th November 1913).

Education. Education has, on the whole, made rapid progress during the last few years. The number of pupils in the high schools has gradually increased to 1,920 and English education seems to be popular with the people. The number of primary schools in the district at present is 330 with a total of 15,448 pupils. The progress of female education cannot however be considered very satisfactory. The people of the higher classes seem apathetic on the subject. Nevertheless the number of girl students has increased considerably, though none of the girls in the district have yet passed beyond the lower primary stage.

Seven new dispensaries have been opened of recent years. Of these, two are situated in the Sibsagar subdivision (one at Sonari and one at Nazira), two in the Jorhat subdivision (at Kakajan and in the Majuli), and three in the Golaghat subdivision (at Barnagaon, Bongaon, and Khumtai). It is proposed to open another in Ahataguri mauza in the Majuli at an early date. All the dispensaries are in charge of Sub-Assistant Surgeons. Medical. Establishment of new dispensaries.

Veterinary Surgeons have been entertained since the year 1908. There are now five assistants in the district. The jurisdictions of each of the two assistants in Sibsagar and Jorhat are coterminous with the boundaries of the Sub-Deputy Collectors' circles, while in Golaghat there is one assistant for the whole subdivision. Veterinary.

A scientific laboratory for the conducting of experiments connected with tea cultivation has been started by the Tea Association at Jorhat near Cinnamara tea estate at a distance of about $2\frac{1}{2}$ miles from the town. Tea Association laboratory.

The provisions of Chapter VII of the Bengal Municipal Act are being extended to the Jorhat Municipality and necessary steps have been taken for the supply of water by means of pipes from a tank excavated behind the Circuit-house compound. Water supply.

The temples at Sibsagar have been declared protected monuments under the Ancient Monuments Preservation Act. Preservation of ancient monuments.

* In 1911 the "daily average" has been calculated on the old and new cases treated. In most of the outlying dispensaries the patients treated for worms and all other general diseases do not come to dispensary a second time for treatment, and in Dimapur Dispensary a large number of colics and cartmen passed by Manipur Road for Abor Expedition, and these were all treated as new patients. Hence the decrease in daily average number of patients treated in spite of the big increase of new patients treated.
